PROFILE

Final-year Computer Science Engineering student (graduating July 2027) specializing in artificial intelligence and computer vision. Founding President of my university's tech club for two consecutive years and Community Lead / Regional Deputy at the Cameroon TIC Foundation, with a consistent record of turning technical skill into community impact.

From mentoring award-winning student teams to organizing Cameroon's first international Hack Club game jam. Currently building an AI-powered exam proctoring system (Raspberry Pi CM4, Hailo-8L NPU, YOLO11) as my capstone project, alongside an entrepreneurial track record running a small laser-personalization business. Fluent in English and French.

LEADERSHIP & COMMUNITY IMPACT

Founding President & Lead – University Tech Club

2 YEARS (CURRENT)

- Founded and lead the university's technology club, directing teams that build web applications and hardware projects to give students practical, real-world skills beyond theory.
- Been a volunteer at the Tic Foundation for 2 years, empowering students in tech across the nation.
- Mentor student teams competing in national tech competitions, coaching a team to 1st place regionally and another to national finalist standing (2025).
- Named Nationwide Best Mentor (2025 edition) for this mentorship work.
- Serve as a reference point across the Faculty of Technology and Engineering Sciences, mentoring students inside and outside the university on final-year projects (e.g. an NFC-card medical management system, a custom RFID reader, and a monitoring/control web app) – all of which went on to earn First Class Honours.

Community Lead & Regional Deputy – Cameroon TIC Foundation

2 YEARS

- Represent the Foundation regionally, connecting student technologists across Cameroon's tech ecosystem.
- Monitor and judge area and departmental hackathons, assessing student projects and selecting the teams that move forward.
- Organize the regional hackathon and prepare qualifying students for the national stage.
- Sat on the jury for the semi-finals of the National Tech & Entrepreneurship competition.

COMPETITIONS, CONFERENCES & MEDIA

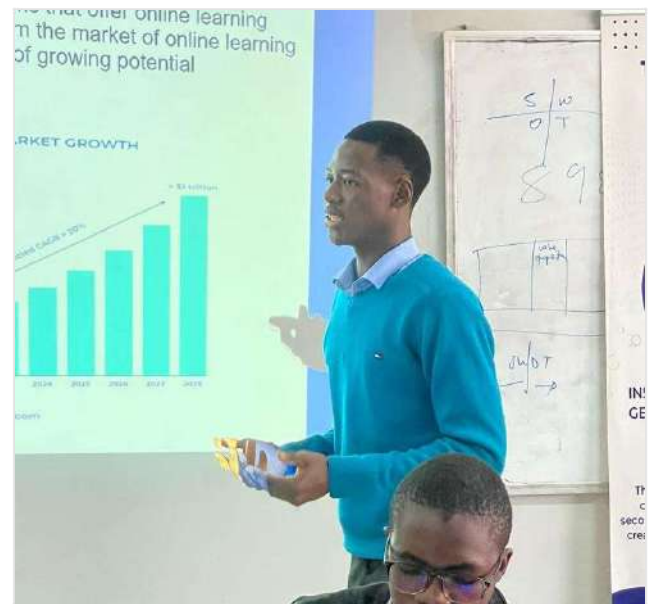

Competitor, Delegate & Interviewee

SINCE A-LEVELS

- Competed at TIC Summit straight after my A-Levels, pitching a project to a national jury.
- Attend AI conferences, seminars and tech workshops nationwide, and take part as a delegate and speaker on student panels.
- Spotted and interviewed by CRTV, Cameroon's national television channel, after an AI seminar.

PITCHING A MARKET ANALYSIS AT TIC SUMMIT

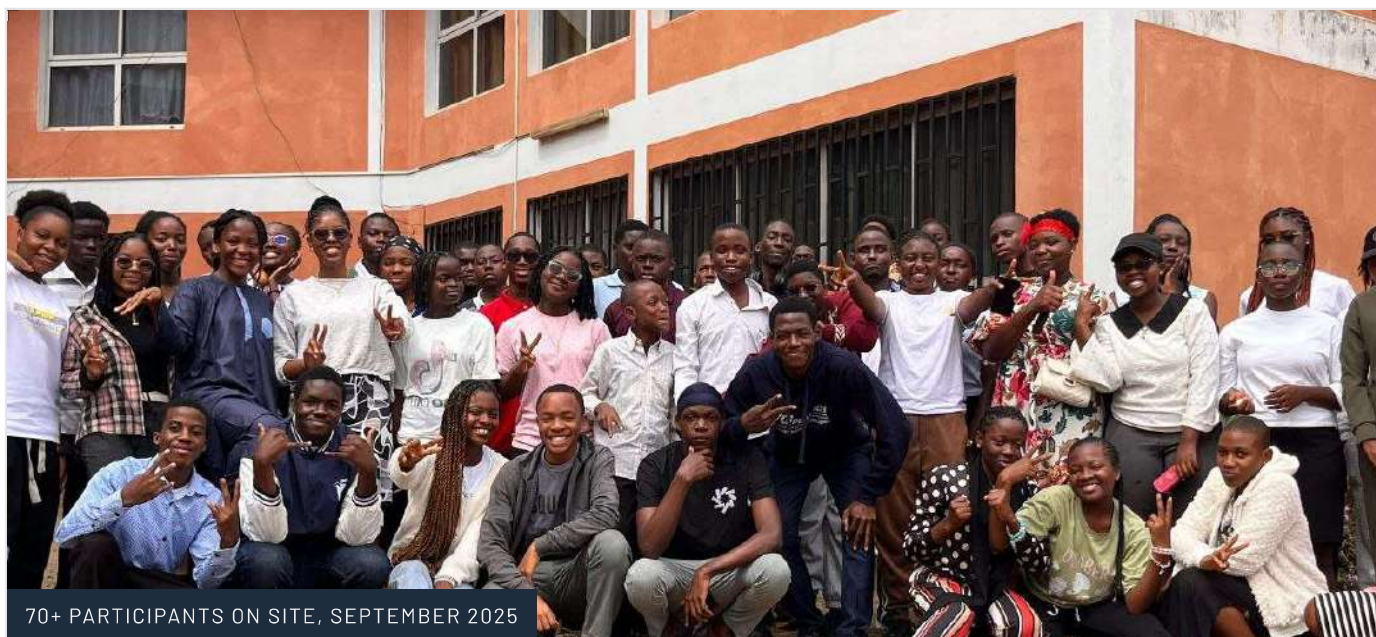

RECEIVING A CERTIFICATE AND GRANT – TIC SUMMIT, 4TH EDITION

DAYDREAM YAOUNDÉ

Lead Organizer – Daydream Yaoundé

SEPTEMBER 2025

- Brought a global Hack Club initiative to Cameroon for the first time. Partnering with them and creating Daydream Yaoundé – the country's first international Game Jam.
- Led a dedicated team to bring over 70 students on-site and build a wider community of 100+, securing international sponsorship in partnership with Hack Club, Cards Against Humanity, and local startups.
- Built a lasting national and international network of tech talent and partner organizations.

XTOOL F1 RECEIVED FOR THE HACKATHON

DONATED UNIT – XTOOL F1, 1% FOR THE MAKERS

TEACHING

Programming Instructor – Primetec IT Centre

TWO SUMMER BOOTCAMPS, FROM AGE 17

- Taught web development to bootcamp cohorts immediately after completing A-Levels, getting awarded and paid for two consecutive summer year program, portraying my early skill valuability and professionalism.

Ambassador & Squad Member – xTool

ONGOING

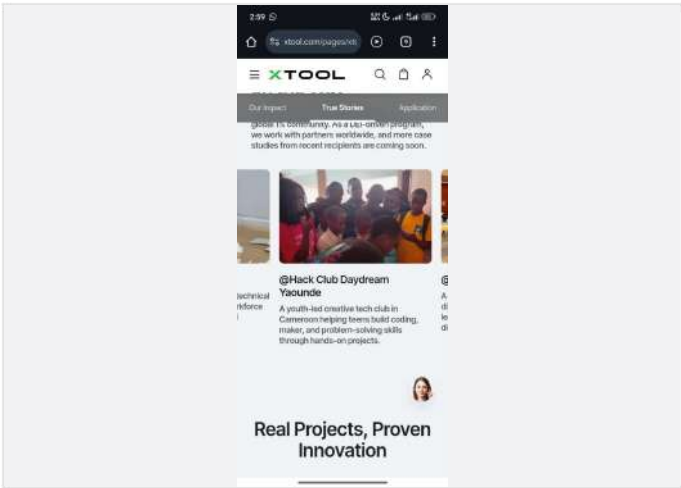

- Represent xTool in Cameroon as a 1% for the Makers partner and Squad member: running live laser demos at faculty fairs and community events, and helping other makers get set up and productive on their machines.
- Our work with the donated xTool F1 was featured on xTool's own pages, where Daydream Yaoundé appears among their maker stories.

TECHNICAL PROJECTS

AI-Powered Exam Proctoring System

ONGOING

- Designing an embedded computer-vision system for automated exam proctoring using Python, Raspberry Pi CM4 paired with a Hailo-8L NPU and YOLO11 for real-time inference. Currently raising the funds to continue buying the necessary equipments.

6-Axis Robotic Arm with Face-Tracking

ONGOING

- Building a 6-axis robotic arm that tracks faces and switches targets via hand gesture recognition, engineered component by component for a deep and scratch understanding be it AI software or Camera and material Hardware.

ESP32 / RFID Point-of-Sale Terminal

- Built a POS terminal on ESP32 with RFID/NFC card support, dedicated transaction-management software, and an offline operating mode. Communicating with a NodeJS Web server and MYSQL database.

Other Production Applications

- Medical Plus : A medical management web application with staff role handling, Hospitals subscribed to the platform and account authorization, manage and access patients medical record from the platform. With Stack : NodeJS/Express, EJS, MYSQL. Hosted on Render and freesqldatabase.com

Tech Club Community Platform

- Built the club's own web application for publishing project reports and videos, handles authentication and account management. The project that portrayed the team's stack into Node.js with Express, EJS, Tailwind CSS, MySQL.

ENTREPRENEURSHIP

Founder — Laser Personalization Business (xTool longterm partnership)

ONGOING

- Run a small custom-engraving business (medals, trophies, corporate gifts) as an xTool 1% for the Makers affiliate and xTool Squad member, handling prospecting, client outreach, and production workflow independently. As well as being an xTool squad member there to help prospects et along with their xTool machines.

TECHNICAL SKILLS

Languages & Frameworks	C, C++, Python (AI/CV), JavaScript, Node.js/Express, MySQL, Godot, Arduino IDE, Bootstrap, TailwindCSS
AI / Computer Vision	YOLO11, Mediapipe, PyTorch, embedded inference (Raspberry Pi CM4)
Hardware & Embedded	Arduino, ESP32, Raspberry Pi, RFID/NFC systems, robotics (4axis, 6-axis arm), 3D printing, laser engraving/cutting
Other	Production web deployment, technical mentorship, community program leadership, event organization

EDUCATION

B.Sc. Computer Science Engineering

EXPECTED JULY 2027

Protestant University of Central Africa (UPAC), Yaoundé, Cameroon

- Anticipated First Class Honours (« mention excellente ») on capstone/graduation project.

Advanced & Ordinary Level

- Represented Cameroon in the UNESCO SIMFA Stock Market Game (Grade 11), leading a team to international recognition.
- Founded the Computer Science Club of his college (Grade 12), teaching programming to 100+ members; led an edtech team that placed 2nd regionally and top nationally, and delivered special remedial classes on ICT and Computer Science with our Club on a dedicated special time table at the principal's request.
- Cohort finished #1 regionally and among the top nationwide in ICT and Computer Science A-Level, producing 17 A's and 30 B's.
